

Wire EDM Pro

Website Structure & Content Overview

This document describes the structure, page layouts and content of the new Wire EDM Pro website for client review. It shows **what each page contains and how it is organised** — layout wireframes and information only, not the visual design.

Site: Wire EDM Pro — precision machining, Sydney

Pages: 22 (9 primary + 12 industry pages + error page)

Platform: Static website (Astro), hosted on Amazon S3 — no server required

Status: Built and ready for content sign-off

Date: 17 August 2026 (revision 2 — turnkey & solutions update)

1 · Site map

Twenty-two static pages. Every page shares the same header and footer.

PAGE	URL	PURPOSE
Home	/	Positioning, interactive 3D centrepiece, process facts, services, credibility, industries, enquiry prompt
EDM Wire Cutting Solution	/wire-edm/	Deepest service page: what wire EDM is, capability specs, when it beats conventional machining, applications
Milling Solutions	/milling/	CNC milling capability, specs and applications
Turning Solutions	/turning/	CNC turning capability, specs and applications
Reverse Engineering	/reverse-engineering/	Bring the sample → we measure → design in Mastercam → turnkey manufacture and delivery
Quality Assurance	/quality-assurance/	QC equipment list and what is checked before delivery
Industries (hub)	/industries/	"Solutions for every industry" — links to all twelve industry pages
12 × Industry pages	/industries/<name>/	Tooling & Diemaking · Sheet Metal Components · Aerospace & Defence · Medical & Dental · Mining · Automotive · Electronics · Energy · Machine Building · Robotics & Automation · Manufacturers · General Engineering
About Us	/about/	Company purpose, working values, machinery, history
Contact Us	/contact/	Contact details, hours, premises photo, call/email actions (no form)
404	/404.html	Friendly not-found page routing back to home

Global header (every page)

LOGO Wire EDM Pro wordmark	SOLUTIONS ▼ Full-width menu: 6 solutions with icons + info strip (incl. Reverse Engineering, Quality Assurance)	INDUSTRIES ▼ Full-width menu: 11 industries with icons + info strip	ABOUT US	CONTACT US Button
--------------------------------------	---	---	-----------------	-----------------------------

Both dropdown menus open as full-width panels containing every destination, a one-line prompt, and quick links (phone / get a quote). On mobile the header collapses to a menu sheet listing all pages.

Global footer (every page)

WORDMARK + ONE-LINE SUMMARY

25+ years, services, industries served

LINK ROW

All eight primary destinations

CONTACT BLOCK

Location · phone · email · copyright

2 · Home page layout

HERO — HEADLINE "We cut hardened steel to five microns." + 25-years commitment line + two actions (Get in touch / View services)				INTERACTIVE 3D MODEL Wire-EDM sample part (spline ring, gear ring, star core). Mouse: X rotates, Y telescopes the nested pieces apart/together. Live X/Y/Z coordinate readout tracks the pointer. Touch: drag to rotate/extend.		
FACT ±0.005 mm tolerance		FACT Maximum part size 420 mm		FACT 0 N cutting force		FACT 25+ years in Sydney
SERVICE CARD EDM Wire Cutting Solution — photo + summary → service page		SERVICE CARD EDM cutting — photo + summary → service page		SERVICE CARD CNC milling — photo + summary → service page		SERVICE CARD CNC turning — photo + summary → service page
TURNKEY STEP 1 · Your proposal (a verbal flow is enough)	TURNKEY STEP 2 · Design in Mastercam	TURNKEY STEP 3 · Design approval	TURNKEY STEP 4 · Material procurement	TURNKEY STEP 5 · Manufacturing	TURNKEY STEP 6 · Quality control	TURNKEY STEP 7 · Delivery
CREDIBILITY BAND (FULL-WIDTH WORKSHOP PHOTO) "Twenty-five years of saying what we can hold. And holding it." + working principles + machine list (Fanuc Robocut x2, Makino, DMG ecoMill 600 V)						
INDUSTRY Manufacturing — tooling that keeps lines running		INDUSTRY Mining — hardened spares without OEM lead times			INDUSTRY Medical — burr-free stainless and titanium	
ENQUIRY BAND "Send us the drawing." + Get a quote button						

FACTS STRIP USES PROCESS FIGURES, NOT MARKETING CLAIMS. NUMBERS COUNT UP AS THE VISITOR SCROLLS TO THEM. SECTIONS REVEAL PROGRESSIVELY ON SCROLL.

3 · Service pages (Wire EDM · Milling · Turning)

All three share one structure so buyers can compare capabilities like-for-like. The Wire EDM page carries one extra section.

SERVICE HERO Name, one-line value proposition, plain-language explanation of the process, Get a quote button	MACHINE PHOTO
WIRE EDM PAGE ONLY: "WHEN WIRE EDM BEATS THE MILL" Why cut after hardening, no cutting force, kerf-radius corners + five-point checklist of when EDM is the right process	
CAPABILITY TABLE Tolerance · kerf/finish · hardness · materials · batch size (figures confirmed per quote)	
"WHERE IT EARNS ITS KEEP" 3–4 application rows: press tools & dies, splines & keyways, medical components, repairs / spares from worn samples	
ENQUIRY BAND Service-specific prompt + Get a quote	

Capability figures shown (industry-typical, flagged for confirmation)

PAGE	KEY FIGURES
Wire EDM	±0.005 mm positional · kerf ≈ 0.25–0.33 mm · to 60+ HRC · Ra 0.4 µm finish · 0 N cutting force · any conductive metal
Milling	±0.01 mm typical · 1-off to repeat batches · steels, stainless, alloys · in-house EDM follow-up
Turning	±0.01 mm typical · metric/imperial/custom threads · titanium & heat-resistant grades · EDM keyways after hardening

4 · Industries section

Hub page (/industries/)

INTRO "Solutions for every industry."		
Card	Card	Card
Card	Card	Card
... 12 cards total, each → industry page		
ENQUIRY BAND "Industry not listed?"		

Each industry page

INDUSTRY HERO Name + why this industry sends us work	
WHAT WE MACHINE 4–6 typical parts for this sector	WHY THE PROCESS FITS + links to the three service pages
ENQUIRY BAND Industry-specific prompt	

The twelve industries

INDUSTRY	POSITIONING LINE
Tooling & Diemaking	Punches, dies and mould components — cut after heat treatment
Sheet Metal Components	Press tooling for sheet metal, plus burr-free wire-cut profiles from stacked blanks
Aerospace & Defence	Exotic alloys, burr-free, no cutting force
Medical & Dental	Stainless and titanium, edges that pass inspection
Mining	Hardened wear parts and fast spares
Automotive	Prototypes, tooling and motorsport one-offs
Electronics	Fine-feature tooling for connectors and stampings
Energy	Power generation and renewables spares
Machine Building	The precision details inside custom machines
Robotics & Automation	Exact fits for moving assemblies
Manufacturers	Food lid containers, packaging tooling and production parts
General Engineering	One-offs, repairs and everything between

5 · Reverse Engineering, Quality Assurance, About and Contact

About Us (/about/)

HERO "A workshop that answers the phone." Since the late 1990s		
PURPOSE "Keep your production moving" + two working values (honest quoting; precision backed by experience)	WORKSHOP + PREMISES PHOTOS	
Machine card: Fanuc Robocuts	Machine card: Makino U-series	Machine card: DMG ecoMill 600 V
THREE INDUSTRIES, ONE HABIT History + reliability narrative		
ENQUIRY BAND "Put us to work."		

Reverse Engineering (/reverse-engineering/)

HERO "No drawing? Bring the part."		
STEP 1 Bring the sample	STEP 2 We measure every dimension	STEP 3 Design created in Mastercam, approved by you
TURNKEY LIFECYCLE The same 7-step flow as the home page carries it to delivery		
ENQUIRY BAND "Got the part but not the drawing?"		

Quality Assurance (/quality-assurance/)

HERO "Measured before it leaves."		
EQUIPMENT TABLE CMM · optical comparator · surface roughness tester · height gauges & surface plate · micrometers & bore gauges · thread gauges · hardness tester (list to be confirmed by client)		
CHECKS Dimensions	CHECKS Surface finish	CHECKS Material & hardness
ENQUIRY BAND Inspection reports on request		

Contact Us (/contact/)

HERO "Send us the job." Quote from drawing, STEP file or photo, by phone or email	
DETAILS Location · phone · email · hours + email/call action buttons	PREMISES PHOTO

6 · Interactive features

FEATURE	BEHAVIOUR
3D sample part (home hero)	A to-scale model of a wire-cut demonstration piece (three nested profiles cut from one blank). Moving the mouse rotates it and telescopes the pieces apart "inside-out"; a machine-style X/Y/Z readout tracks the pointer. Draggable on touch devices. Falls back gracefully on old browsers and respects reduced-motion settings.
Full-width menus	Solutions and Industries open as full-width panels with icons and quick links; keyboard and touch accessible.
Scroll animation	Sections and cards ease in as the visitor scrolls; the four process facts count up when first seen. One-shot, subtle, disabled for reduced-motion users.
Service card hover	Photo zooms gently inside the card frame.
Turnkey lifecycle	Seven-step flow (proposal → Mastercam design → approval → procurement → manufacturing → QC → delivery) revealed step by step on scroll; shared by the Home and Reverse Engineering pages.
Contact actions	No form by design: prominent "email your drawing" and "call the workshop" actions; enquiries go straight to the inbox/phone.

7 · Technical summary

- **Fully static site** — no server, no database. Deploys to an Amazon S3 bucket with a one-command upload; near-zero hosting cost.
- **Fast** — self-hosted fonts, responsive optimised images, 3D library loads only on the home page.
- **Accessible** — all colour combinations meet WCAG AA contrast; keyboard navigation throughout; reduced-motion respected.
- **SEO-ready** — unique titles and descriptions per page, sitemap, robots.txt, semantic markup.
- **Responsive** — mobile layouts for every page, including a stacked, touch-interactive hero.

8 · Content requiring client confirmation

The following are placeholders or industry-typical values awaiting sign-off before go-live.

ITEM	CURRENT STATE
Street address / phone / email / hours	Placeholder values shown site-wide
Domain name	wireedmpo.com.au assumed
Capability figures	Industry-typical (± 0.005 mm, Ra 0.4 μ m, ± 0.01 mm; 60+ HRC on the service page) — confirm against actual machines
Machine models	Read from workshop photos — confirm exact models to publish
Maximum part size 420 mm	Shown on the home facts strip; confirm which process/axis it applies to

QC equipment list	Industry-typical instruments shown; confirm against the actual inspection room
Mastercam	Named as the design platform on turnkey/reverse-engineering content; confirm wording
Logo	Typographic wordmark in use; supply artwork if one exists
Certifications	None claimed — add only if genuinely held
